

## Groundwater in Mining and Resources Panel

**Dr Wendy Timms**

Professor, Environmental Engineering at Deakin University

Dr Wendy Timms has over 24 years of professional experience, mainly in Australia and Canada, on water and waste issues in both mining and agriculture. She has experience across consulting engineering, government, research and education as a hydrogeologist and environmental engineer.

Wendy leads and contributes to research projects funded by the Australian Research Council and various partners, generating new knowledge and technologies and developing leading practices. Information on publications and current research is available on Google Scholar and ResearchGate.
