

Groundwater in Mining and Resources Panel

Mr Christopher Loveday

DIRECTOR - OPERATIONAL SUPPORT | REGULATORY SUPPORT /
DEPARTMENT OF ENVIRONMENT AND SCIENCE

Christopher has more than 16 years government experience providing outcome-focused regulation of the resources and agricultural sectors in Queensland. He is currently working in a regulatory support role with the Department of Environment and Science, leading the departments Environmental Impact Assessment activities for large scale resource projects.

He was previously involved in the development and implantation of Water Plans for various surface and groundwater areas across Queensland, including the Great Artesian Basin. He has extensive experience with community groups and landholders in Central and Western Queensland regarding both surface and groundwater licensing.
