

## Groundwater and Infrastructure Panel

**Dr Richard Evans**

Principal Hydrogeologist with Jacobs

Dr Richard Evans is Principal Hydrogeologist with Jacobs and has had 35 years experience in groundwater and geotechnical engineering projects. He has had extensive experience in groundwater investigations, focussing on dewatering requirements, environmental impact assessment, surface water groundwater interaction, recharge systems, grouting and management and design of groundwater processes associated with tunnels and large excavations. He has undertaken groundwater investigations and contributed to tunnel design for many road, rail, mine and water tunnels in Melbourne, Sydney, Brisbane, and Auckland. These range in diameter from 3m up to 20m.
