

Groundwater and the Environment Panel

Ms Katharine Glanville

Project Manager, Department of Environment and Science

Katherine is an experienced analyst with the proven ability to synthesize and translate complex information into holistic, snack-able, sharable, and easily digestible products that are critical in our increasingly connected, visual world. At the intersection between academia, government and non-governmental organizations, Glanville's is able to draw on a unique analysis and assessment skill set to develop tailored innovative solutions in the field of groundwater hydrology and ecology.

Glanville's transdisciplinary academic and professional specialties includes:

- Integrated Water Management (BMarSt, MIWM);
- Data Analysis and Visualization (MSc);
- Remote Sensing (MSc);
- Client Communications;
- Project and Program Monitoring and Evaluation; and
- Environmental Law (MEnvLaw).
